# POLICY

Vinidex is a leading manufacturer and distributor of pipe and transport and fittings systems. We supply innovative technical solutions for the transportation of fluids, energy and data for applications in infrastructure development, agriculture, mining and building industries.

Vinidex is committed to processes and products that comply with all relevant statutory and regulatory requirements. The quality of our products and services from our processes shall meet customer requirements, and where applicable, relevant Australian and International Standards.

Executive management and senior site management are responsible for integrating quality requirements into all areas and situations of the work environment by reviewing product risk, technical developments, scientific advancements, people skills, customer needs and community expectations.

Vinidex is committed to continual improvement through a systematic risk evaluation process, internal controls and corporate objectives to effectively and efficiently satisfy customer requirements and improve all processes and associated resources.

All employees are responsible for managing their activities in accordance with the Vinidex corporate procedures and internal controls and are encouraged to contribute towards the achievements corporate objectives.
