

Vinidex PVC  
DWV Pipe

Introducing

# converge™

Vinidex PVC  
Combination  
Expansion/  
Inspection Opening

The newest addition to Vinidex's  
RVASS range, Converge is a unique  
PVC aerator perfect for single stack  
system applications.

Converge PVC  
Aerator

Vinidex PVC  
DWV Pipe

Saves space in service  
risers with integrated vent  
tube = more usable  
floor area

Less pipework =  
less penetrations, less time,  
less cost

Seamless integration with  
other Vinidex PVC DWV  
piping solutions

Design flexibility -  
a single aerator fitting offers  
6 branch connection options

Single Aerator

VX58293

Aerator Kit

VX58301

INDIVIDUALLY  
TESTED

SMK1246

WaterMark  
WMKA1246

100% RECYCLABLE

AUSTRALIAN MADE

## The Converge RVASS Advantage

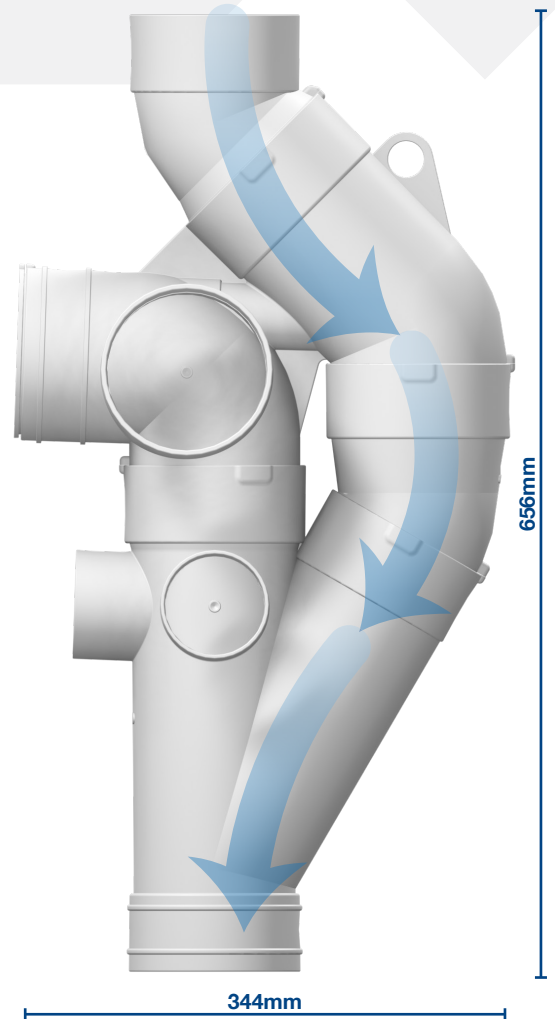

Converge PVC RVASS (Reduced Velocity Aerator Stack System) helps ensure trap seal integrity thereby protecting building occupant health.

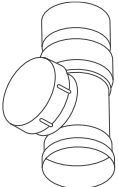

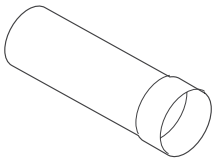

The key RVASS component, the Converge aerator design achieves this by:

- Incorporating a vent tube to ensure the core column of air is maintained between the stack and branch lines limiting excessive pressure differentials; while also
- Smoothly controlling the effluent speed in the stack and ensuring no dead zones exist where waste can build-up over time leading to long-term health concerns.
