

## PRODUCTS FOR USE IN CONTACT WITH DRINKING WATER

## **AS/NZS 4020**

AS/NZS 4020 specifies requirements for the suitability of products for use with drinking water with regard to their effect on the quality of water.

Pressure pipes and fittings are used for potable or drinking water supply, reticulation and plumbing. Australian Standards for pressure pipes and fittings used in these applications specify that pipes and fittings are tested to and conform with the requirements of AS/NZS 4020. StandardsMark and WaterMark certification to Australian Standards for pressure pipe will include the requirements of AS/NZS 4020.

Non-pressure pipes and fittings are not generally intended for drinking water applications and therefore the associated Australian Standards do not require conformance with AS/NZS 4020 as part of their performance requirements. Vinidex however, has tested all Vinidex manufactured PVC pipes and fittings for DWV and Stormwater applications for contact with drinking water.

Vinidex Pipe and Fittings that conform to the requirements of AS/NZS 4020 and are suitable for contact with drinking water are listed below:

**PVC-U** pressure pipes and fittings to AS/NZS 1477

Supermain® PVC-O pressure pipes to AS/NZS 4441

Vinidex Hydro® PVC-M pipes to AS/NZS 4765

Vinidex DWV pipes and fittings to AS/NZS 1260

Vinidex Stormwater pipes and fittings to AS/NZS 1254
