

Download the new FRIAMAT APP

How to guide

Once you have downloaded the FRIAMAT APP from Google Play or the Apple App Store you are one step closer to having access to key information on your fusions, barcodes, overviews & the ability to send key information. The FRIAMAT APP allows control at any time, online and offline.

The FRIAMAT APP is so easy to use we have summed it up in 4 simple functions outlined below. Contact Vinidex Customer Service for further information or trouble shooting.

1 Fusion

Comfortable operation of the FRIAMAT during the fusion process.

2 Overview

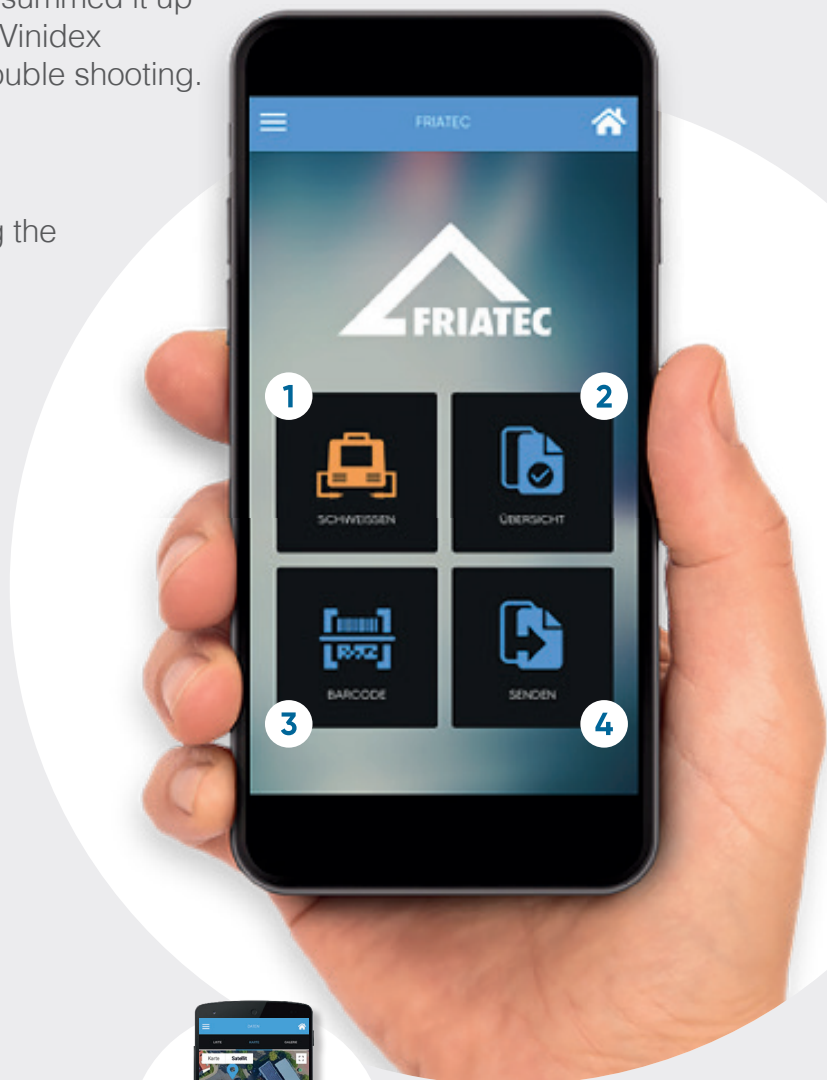

Filter and search functions for optimized display. Add additional information such as geolocation data, photos and comments quickly and easily.

3 Barcode

Read barcodes and display all relevant data simply and clearly.

4 Sending

Easily send selected work results by email and document them comprehensively.

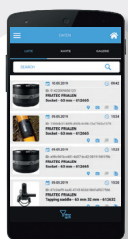

Simplified fusion process through intuitive input

All fusion information always at a glance

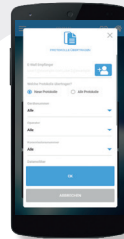

Clear display of work progress

Product lists with extended information overview

Detailed information on all products including images, geolocation data and comments

Direct dispatch of all or selected work records to one or more recipients at the same time
