

XGuard™ by Vinidex

Impact-resistant PVC Conduit

Heavy-duty performance.
Lightweight handling.

Introducing XGuard™ by Vinidex

XGuard is our new electrical and communications conduit that's impact-resistant, lightweight and easy-to-install.

As leaders in manufacturing and advanced pipeline systems, we're constantly innovating our products to improve performance and meet the needs of our customers. With XGuard, we've created a durable, easy-to-handle, lightweight product with improved impact-resistance. Through its newly designed corrugated structure, we've reduced the amount of plastic needed in manufacturing – reducing the energy used – making XGuard a more sustainable product solution.

Meet your next project's performance needs and regulation requirements with XGuard by Vinidex.

Heavy-duty performance. Lightweight handling.

Meet our new electrical and communications conduit that's impact-resistant, lightweight and easy-to-install.

Strong and ductile

Designed to withstand multiple heavy impact strikes.

Lightweight

Easier to install and handle than traditional straight wall HD conduits.

Material efficient

Uses less material than traditional HD straight-walled conduits.

Compliant

Meets Australian standards and exceeds impact testing requirements.

Lower embodied energy*

Requires less embodied energy to manufacture.

Flexible

Suitable for long radial bends.

*Against the alternative straight wall HD & VHD conduit.

XGuard™ Specification Guide

XGuard is offered in three nominal diameters, DN100, DN125 and DN150, in both electrical and communications conduits. Partner your conduit with XGuard Slip Coupling. Visit our website for more information.
